/imagine parameters and symbols

Short code	Long code	Values	Notes
::		0.1 to 10	Breaks up text prompts to assist AI comprehension, may also be used to weight preceding text (:: is default of 1)
--ar	--aspect	16:09:00	Define an aspect ratio of width:height
--v	--version	1, 2 or 3	define algorithm version
--hd			high definition, less consistent
--no		text	do not include the item stated as text in the image
--stop		10 to 100	stop generation early
--uplight			use lighter upscaler for upscaling
--seed		integer	seed for more consistent images (still varies somewhat)
--same seed		integer	four similar images
--s	--stylize	625 to 60000	how stylised the image will be (default 2500)
--q	--quality	0.25,0.5,1,2,5	Amount of time to spend for quality (default 1)
--video			save progress video (retrieve by reacting with 📺)
--iw		0.1 to 5	Weighting of images to words (default is 0.25)
